1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 6, 7, 9, 10, 12 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Mercer. In addition to the first and second shafts and other structure clearly shown Mercer is also considered to teach the balancing of torque transfer as claimed. Note the opposed gear plates of the identical mounting brackets as disclosed in the reference. See also the beginning of column 4.

3. Claims 5, 8, 11, 13, 14 and 21-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 15-19 are allowed.

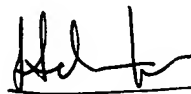

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacob K. Ackun Jr. whose telephone number is (703)308-3867.
